Arunai Engineering College

(An Autonomous Institution)

ABSTRACTION:

EduConsultPro Institute is a leading educational institution offering a variety of courses and programs in diverse fields. With a growing number of prospective students seeking admission each year, the institute faces challenges in managing the admission process, students enquiry, and expert consulting services efficiently. To address these challenges, EduConsultPro Institute decides to leverage Salesforce CRM to streamline the admission process and enhance the overall experience for both students and admissions staff

A CRM Application to Manage the Services offered by an Institution

Hardware Required:

System with advance configuration

Software Required:

Salesforce Platform

System Required:

Good Configuration

EduConsultPro Institute is a leading educational institution offering a variety of courses and programs in diverse fields. With a growing number of prospective students seeking admission each year, the institute faces challenges in managing the admission process, students enquiry, and

expert consulting services efficiently. To address these challenges, EduConsultPro Institute decides to leverage Salesforce CRM to streamline the admission process and enhance the overall experience for both students and admissions staff.

The use case focuses on the admission process for prospective students interested in enrolling in courses and programs offered by EduConsultPro Institute. The goal is to provide a seamless and transparent experience for students while enabling admissions staff to efficiently review and process admission applications, students enquiry and case management.

Requirements

1. Admission Application Management:

Prospective students should have access to the admission application form through the institute's website or portal. The admission application form should collect comprehensive information including personal details, academic history, and qualification. Submitted admission applications should be captured and stored in the Salesforce CRM system. Students should receive automated email notifications after successful submission of application. Admissions staff should be able to generate reports and dashboards to analyze application metrics, acceptance rates, and enrollment trends.

2. Approval Process Requirements :

Implement an Approval process in Salesforce to review and approve Consulting Request. Set up email alerts to notify relevant students when he/she is approved or rejected. Ensure that request gets automatically submitted when it is created.

3. Consulting Services Management:

Prospective students should be able to request consulting services through the institute's website or portal. The consulting request form should capture student details, consulting preferences, and areas of expertise required. Submitted consulting requests should be recorded in the Salesforce CRM system. Consultants and advisors should receive automated email notifications for new consulting requests. Consultants should be able to view, accept, and manage consulting requests within the Salesforce CRM interface. Consulting appointment scheduling should be facilitated within Salesforce, including date, time, and purpose of the appointment. Appointment status (e.g., scheduled, completed, canceled) should be tracked and updated in Salesforce.

4. Immigration Case Management:

Students should be able to initiate immigration cases through the phone, email or web. The immigration case submission form should capture case details, and relevant information. Submitted immigration cases should be recorded and stored in the Salesforce CRM system. Immigration agents and case managers should receive automated email notifications for new immigration cases. Immigration agents should be able to view, process, and track immigration cases within the Salesforce CRM interface. Case status (e.g., open, in progress, closed) should be tracked and updated in Salesforce. Document management and collaboration tools should be integrated to facilitate case processing and communication.

Create Objects from Spreadsheet

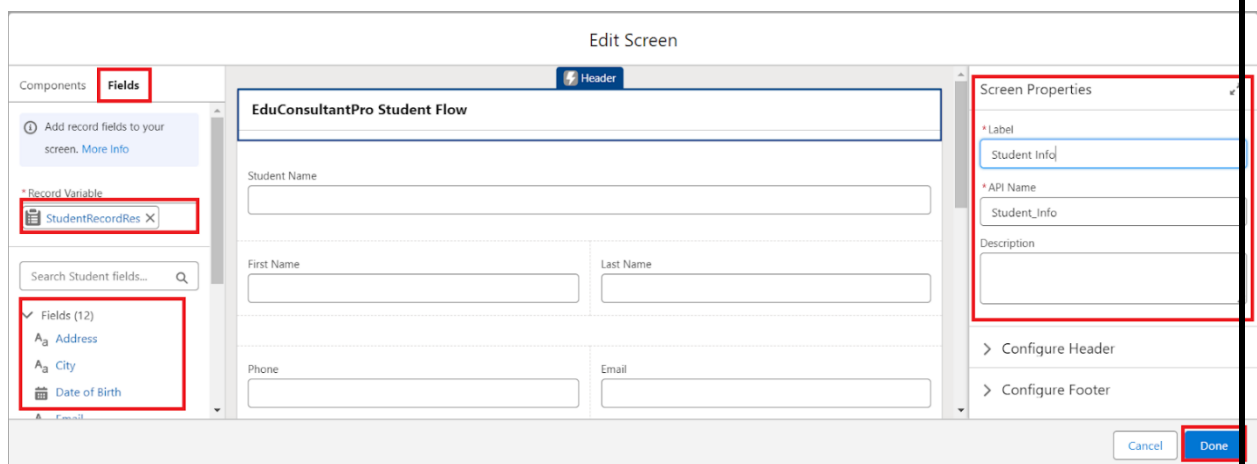

Directly Creating Objects from Spreadsheet in Salesforce

Create a ScreenFlow for Student Admission Application process.

Add Screen Element

- 1. From Setup, enter Flow Builder in quick find, select new flow --> ScreenFlow.**
- 2. Add a Screen element.**

3. In the Screen Properties pane, for Label, enter “Student Info”.
4. Click on Fields, click on the record variable input and create a new Resource(StudentRecordRes) to display all the fields which are in the student object. Drag all the fields which are needed to add on the screen inorder to collect the student information.

Create Student Record using Create Element

1. Add a Create element after Student Info Screen Element, Label it as “Create Student Record.”
2. Select “one” under How many records to Create, and select “use all values from a record” under How to Set the record fields.
3. Select the record variable resource(StudentRecordRes) which we have created in the Student Info screen element, under Create a record from these

values.

New Create Records

* Label

Create Student Record

* API Name

Create_Student_Record

Description

☒ Use all values from a record

☐ Use separate resources, and literal values

Create a Record from These Values

* Record

 StudentRecordRes

×

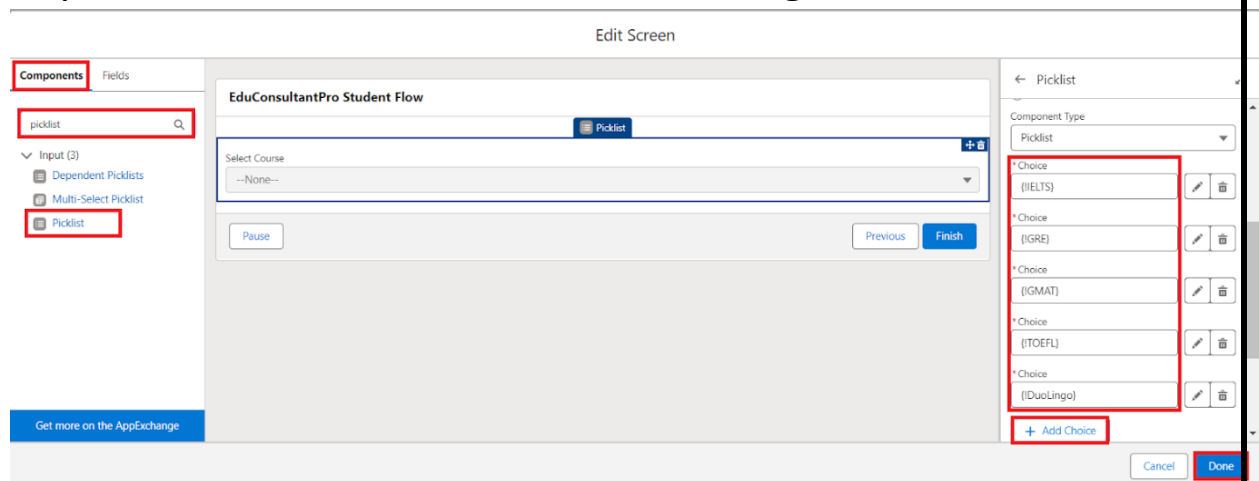

Make sure that ID is blank. After the flow creates the records, ID is set to match the record that was created.

Add Screen Element

1. Add a Screen Element after Create Student Record Element and label it as Course Screen.
2. Add a picklist component from the left side panel label it as “Select Course”, under choices type “IELTS” and enter. This creates a variable with the name IELTS.

3. Repeat the same for GRE, GMAT, Duolingo, TOEFL.

Add Decision Element

1. Add a Decision Element after Select Course Screen Element, label it as Selecting Course.
2. Under outcome label it as “Selected IELTS” and write the condition such as below:
Resource : Select_Course (Screen Component from Select Course Screen Element)
Operator : Equals
Value : IELTS (Choice Variable from Select Course Screen Element)
3. Click on the “+” icon and Repeat step 2 for other options mentioned as below:
 - a. GRE
 - b. GMAT
 - c. DuoLingo
 - d. TOEFL

4. Click Done.

 Edit Decision
Selecting Course (*Selecting_Course*)

8. Repeat the steps 1 & 2 for the GRE, GMAT, TOEFL, DuoLingo paths.

Create Email Text Template Variables for email body and subject

1. Click on the toggle toolbox on the left corner, click “New Resource”, then select “Text Template” as Resource Type.
2. Give the API name as “StuRegistrationEmailTextTempBody”, select “view as plain text” and paste the below text in body.

“Dear {!StudentRecordRes.Name},

Congratulations and welcome to EduConsultantPro!

We are delighted to inform you that your registration on our platform has been successfully completed. You are now part of our esteemed community dedicated to empowering students like you to achieve their educational and immigration aspirations.

At EduConsultantPro, we understand the importance of your academic and career goals, and we are committed to providing you with the highest level of support and guidance throughout your journey.

Here are a few key points to help you get started:

Explore Our Resources : Take some time to explore the wide range of resources, tools, and services available on the EduConsultantPro platform. From educational insights to immigration advice, we offer comprehensive support tailored to your needs.

Connect with Our Consultants : Our team of experienced consultants is here to assist you at every stage of your educational and immigration endeavors. Don't hesitate to reach out to us with any questions, concerns, or inquiries you may have. We're here to help!

Stay Updated : Keep an eye on your inbox for important updates, announcements, and exclusive opportunities from EduConsultantPro. We'll ensure that you're informed about the latest developments and relevant information to support your journey.

Engage with the Community : Join our vibrant community of students, professionals, and experts who share your passion for education and global opportunities. Connect with like-minded individuals, participate in discussions, and expand your network.

Once again, congratulations on taking this important step towards realizing your academic and career aspirations. We are thrilled to have you as part of the EduConsultantPro family and look forward to supporting you on your journey to success.

If you have any questions or need assistance, please don't hesitate to contact us.

Thank you.”

{!StuRegistrationEmailTextTempSub}

 Include

Add Screen Element

1. Add a Screen Element after the Send Email to Student Action Element, label it as Success Screen.
2. From the left side panel search for the Display text component and drag it to the main panel, label it as "SuccessMessage".
3. Paste the below in the Resource picker box.

"Dear {!StudentRecordRes.Name},

Congratulations and welcome to EduConsultantPro!

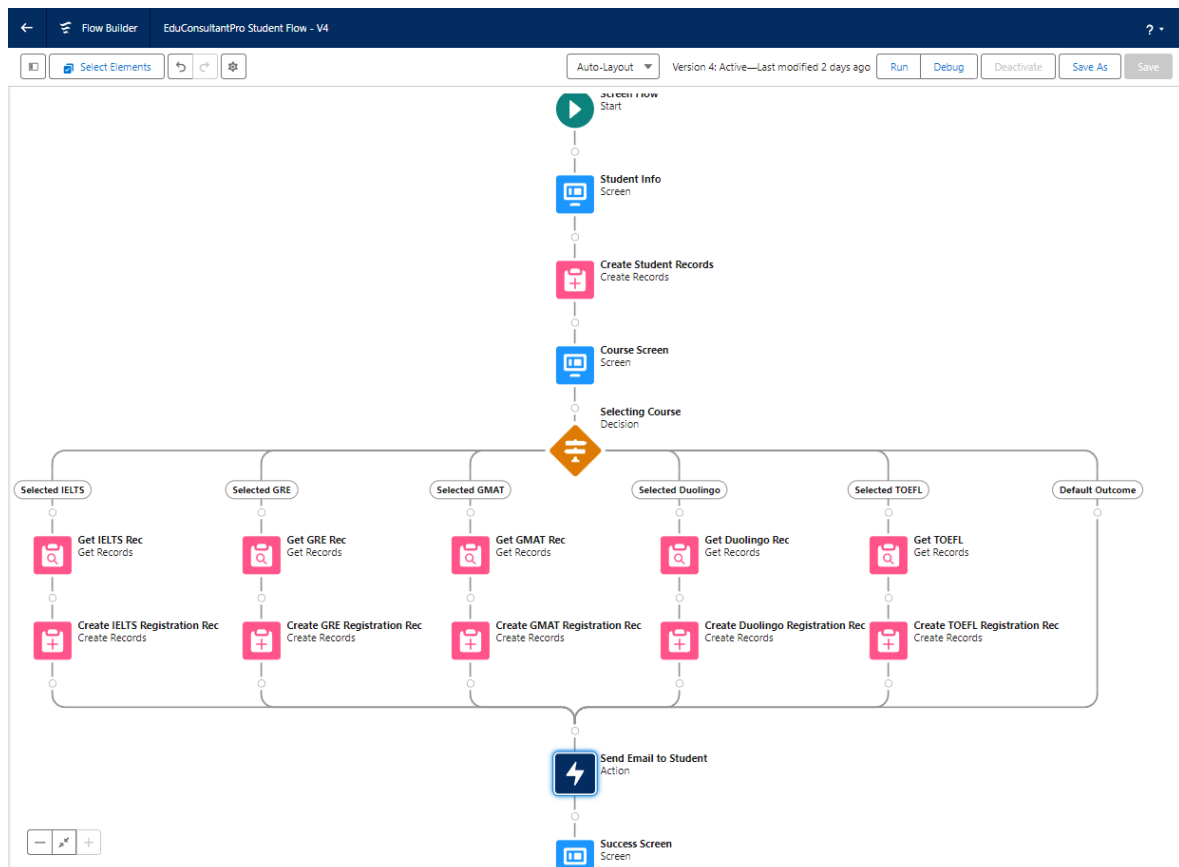

We are delighted to inform you that your registration on our platform has been successfully completed. You are now part of our esteemed community dedicated to empowering students like you to achieve their educational and immigration aspirations.

Your Registration details have been sent through mail kindly check it once.

Thank you."

4. Click Done.

5. Save the flow and name it as “EduConsultPro Student Flow”. Your flow will look as shown below:

Create Users

Create a user with a Standard platform user profile.

User

1. Go to Setup --> Administration --> Users --> New User
2. LastName : Consultant
3. License : Salesforce Platform

4. Profile : Standard Platform User
5. Fill all the mandatory fields & Save.

Configure the User Settings

1. Go to Setup --> Administration --> Users --> click Edit next to your name
2. Scroll down to bottom, under Approver Settings, Select “Consultant” the Manager Field.
3. Click Save.

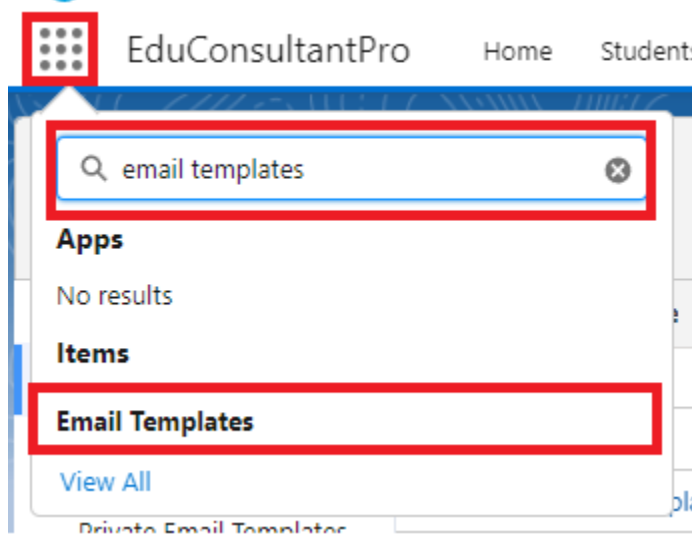

The screenshot displays the 'Approver Settings' form. It includes a 'Delegated Approver' field, a 'Manager' dropdown menu currently set to 'Consultant', and a 'Receive Approval Request Emails' dropdown menu set to 'Only if I am an approver'. At the bottom, there are three buttons: 'Save', 'Save & New', and 'Cancel'. Red boxes highlight the 'Manager' dropdown and the 'Save' button.

Create an Approval Process for Property Object

Create an Email Template

1. From Setup, enter Templates in the Quick Find box, and then select Lightning Email Templates, toggle on.

2. go to app launcher, search for “Email Templates”, Create a new folder with the desired name.
3. Then create a new email template, select the folder which we have created in the previous steps, enter the below text in the HTML Value and Save it as "Submission Template".

"Dear {{{Appointment__c.Student_Name__c}}},

I hope this email finds you well. I am writing to confirm the details of our upcoming appointment scheduled for {{{Appointment__c.Appointment_DateTime__c}}} regarding {{{Appointment__c.PurposeTopic__c}}}.

Appointment Details:

Appointment No : {{{Appointment__c.Name}}},

Student Name : {{{Appointment__c.Student_Name__c}}},

Consultant Name : {{{Appointment__c.Consultant__c}}},

Date & Time :

{{{Appointment__c.Appointment_DateTime__c}}},

Purpose : {{{Appointment__c.PurposeTopic__c}}}

I want to assure you that I am looking forward to our meeting and am fully prepared to address any questions or concerns you may have regarding

{{{Appointment__c.PurposeTopic__c}}}. Your success and satisfaction are my top priorities, and I am committed to providing you with the guidance and support you need.

If you have any specific topics or questions you would like to discuss during our appointment, please feel free to share them with me in advance. This will help ensure that our time together is as productive and beneficial as possible.

If for any reason you need to reschedule or cancel our appointment, please notify me at your earliest convenience so that we can make alternative arrangements.

Once again, thank you for choosing to work with me on this matter. I am confident that our collaboration will lead to positive outcomes and progress toward your goals.

If you have any questions or require further information before our scheduled appointment, please don't hesitate to reach out to me.

Looking forward to our meeting.

Best regards,

{{{Recipient.Name}}},

4. Create two more Email templates for Approval and Rejection of Request similar to the previous one.

Create an Approval Process

1. From Setup, enter Approval in the Quick Find box, and then select Approval Processes.
2. In Manage Approval Processes For, select Appointment.
3. Click Create New Approval Process --> Use Jump Start Wizard.

4. Configure the approval process.

5. Process Name - Appointment Approval, Under Select Approver, Select Manager for the option : “Automatically assign an approver using a standard or custom hierarchy field.”

Select Approver

Using the options below, specify the user to whom the approval request should be assigned.

☐ Let the submitter choose the approver manually.

☒ Automatically assign an approver using a standard or custom hierarchy field: Manager

☐ Automatically assign to queue.

☐ Automatically assign to approver(s).

Because this is the Jump Start Wizard, Salesforce automatically chooses some settings for you. [Show More](#)

Save Cancel

6. Click next and “Next Automated Approver Determined By” --> Select Manager.

7. From Record Editability Properties --> Click on Administrators OR the currently assigned approver can edit records during the approval process.

8. Save the approval process.

9. Click View Approval Process Detail Page.

10. Under Initial Submission Actions, click Add New --> Field Update, and configure it with these values.

Field	Value
Name	Submitted
Field to Update	Appointment: Status

A Specific value	Pending
-------------------------	----------------

Initial Submission Actions 

Add Existing
Add New ▼

Action	Type	Description
	Record Lock	Lock the record

Task
Email Alert
Field Update

11. click Add New --> Email Alert, and configure it with these values.

Description : Submission Email Alert

Unique Name : Auto Populates

Email Template : Submission Template

Recipient Type : Select your Name

12. Repeat the Steps 10 - 11 for Final Approval and Final Rejection actions.

Create a Record Triggered Flow

Configure the Start Element

1. From Setup, enter Flows in the Quick Find box, then select Flows.
2. Click New Flow.
3. Select Record-Triggered Flow.
4. Click Create. The Configure Start window opens.
5. For Object, select Appointment.

6. For Trigger the Flow When, select A record is created. The flow will look like this:

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

* Object

Appointment

Configure Trigger

* Trigger the Flow When:

- ☒ A record is created
- ☐ A record is updated
- ☐ A record is created or updated
- ☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

None

* Optimize the Flow for:

Fast Field Updates

Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database.

Actions and Related Records

Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

☐ Include a Run Asynchronously path to access an external system after the original transaction for the triggering record is successfully committed

Add an Action Element

1. Add an Action element after the Start Element and Select the Submit for approval action, label it as "Approval SubFlow".

2. Set the RecordId to “{!\$Record.Id}”.

 Edit Submit for Approval
approval subflow (*approval_subflow*)

* Label

approval subflow

* API Name
